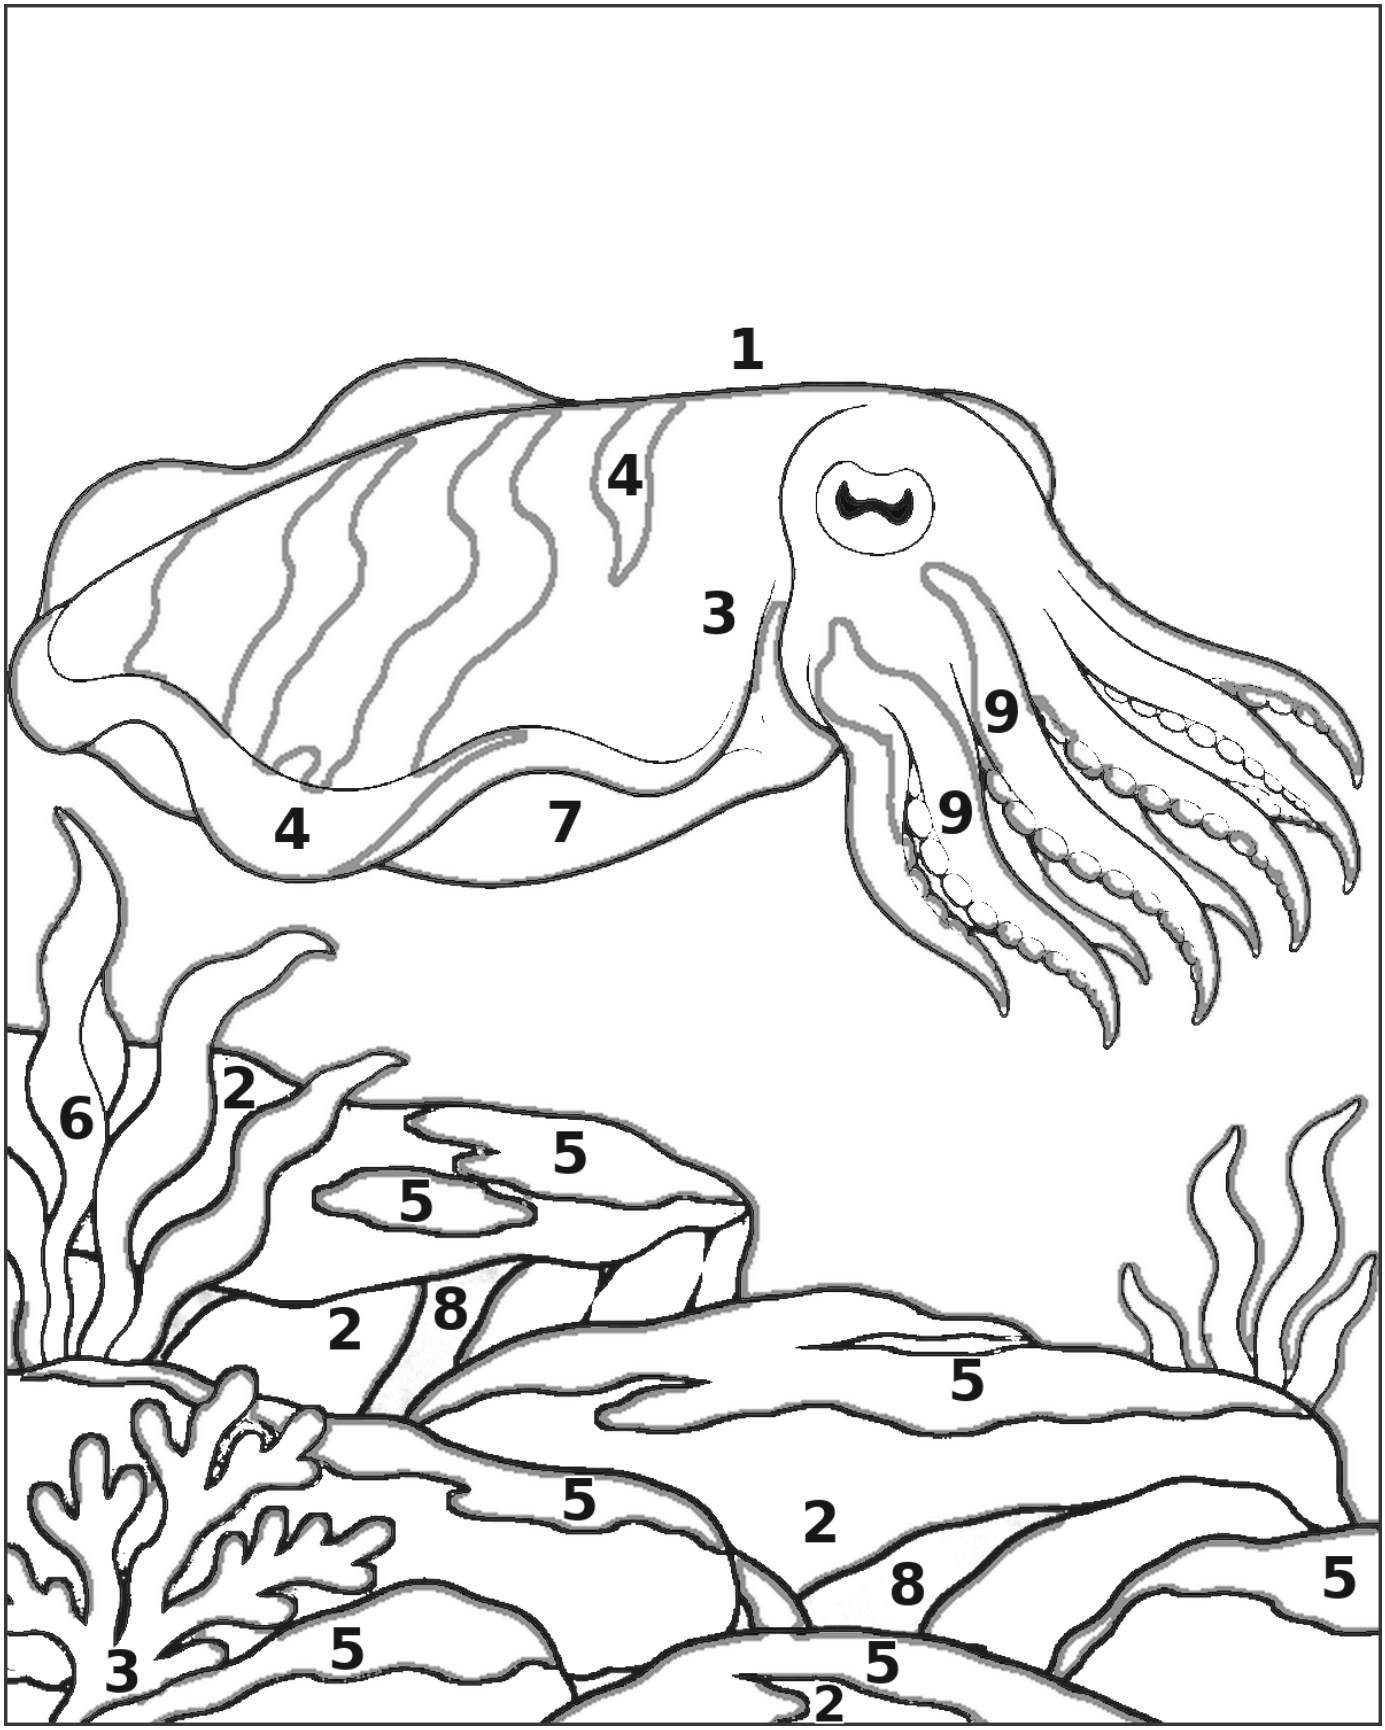
Common Cuttlefish

What kind of shell does a cuttlefish have?



1 Seafoam	**2 Pine**	**3 Rust**
4 Honey	**5 Meadow**	**6 Moss**
7 Cream	**8 Olive**	**9 Copper**

Did you know? A cuttlefish carries a chalky shell inside its body. It is called a cuttlebone. Tiny chambers in it help the animal stay at the right depth without having to swim constantly.
