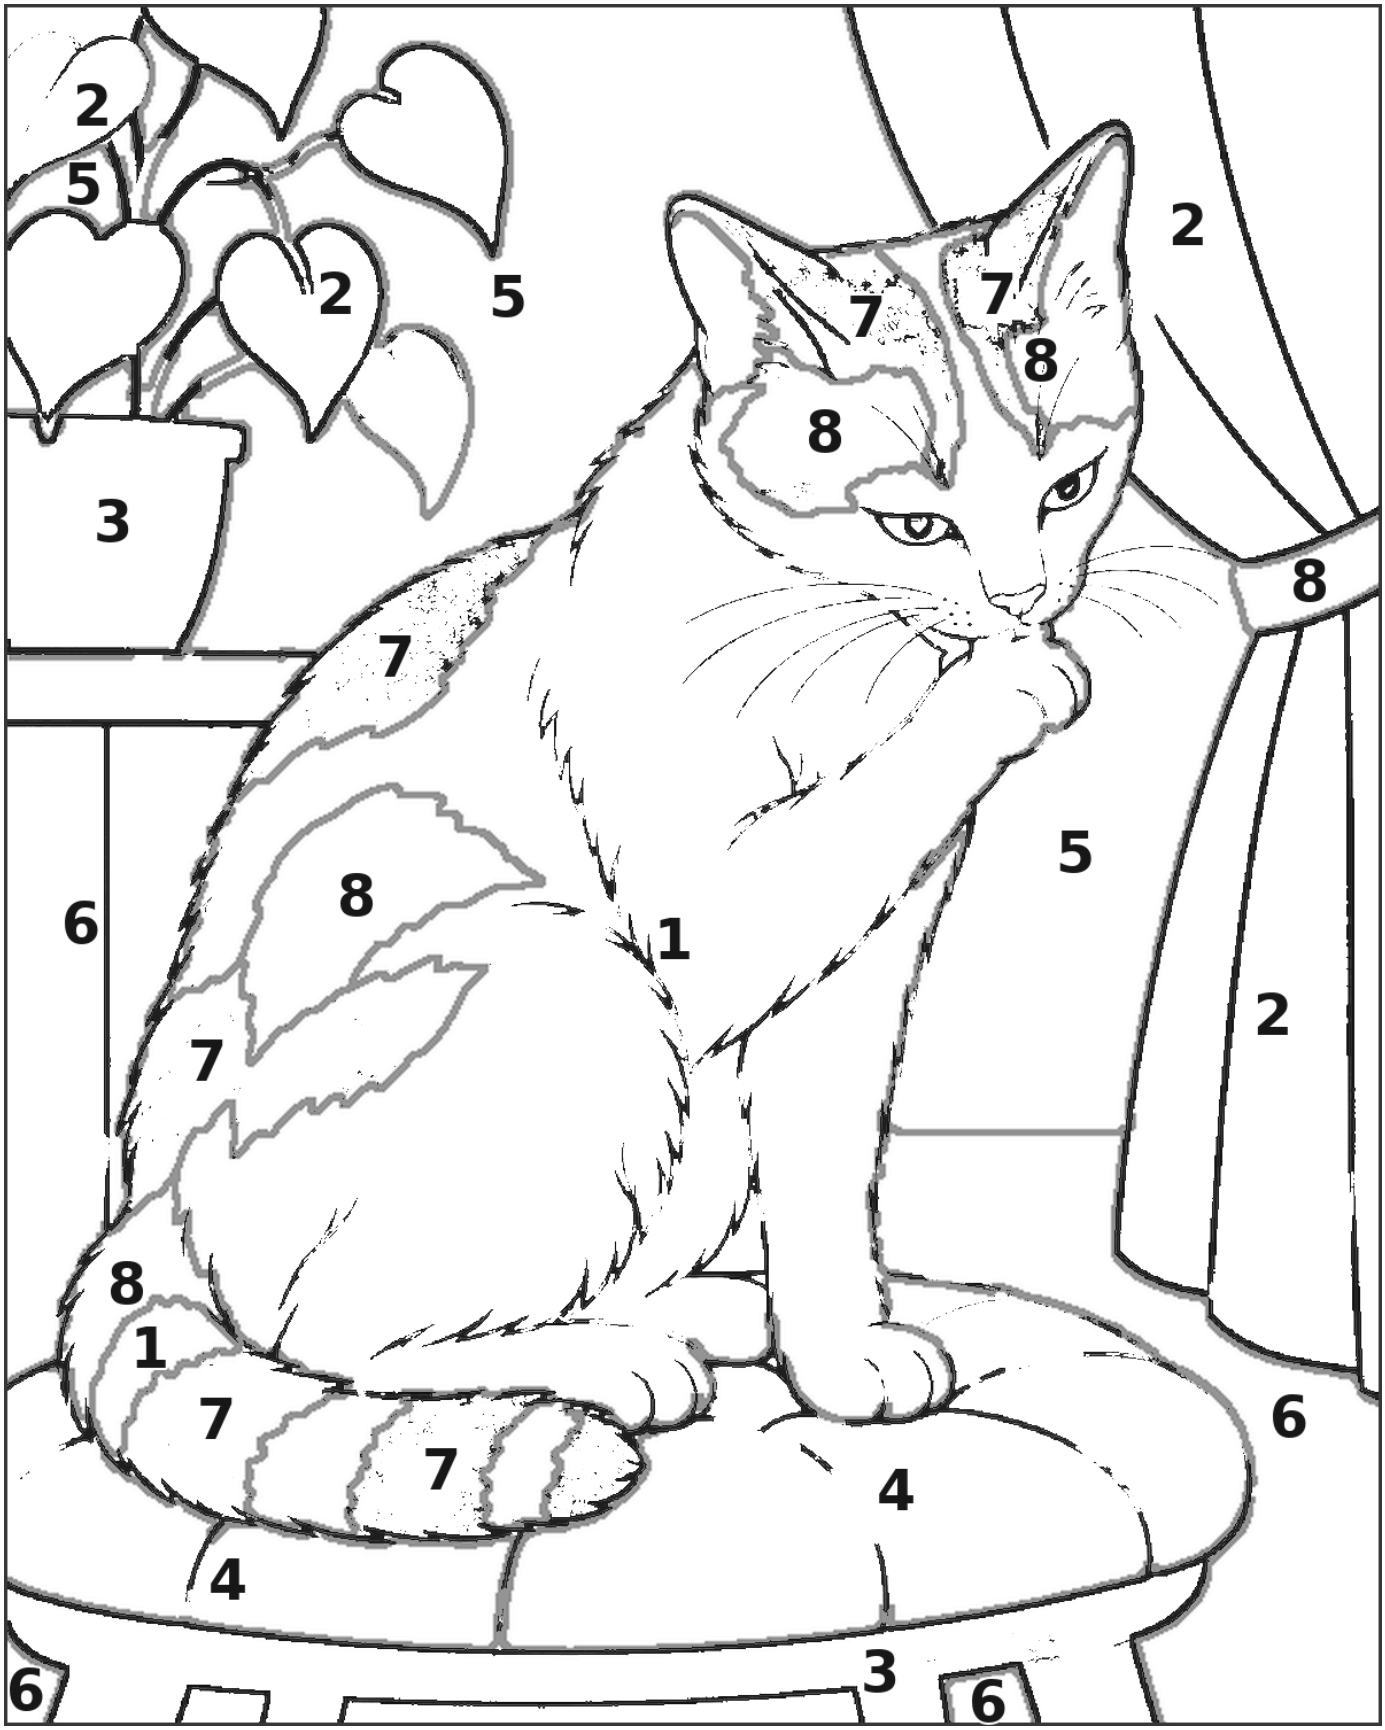
# Kitten Washing Up

Why does a cat's tongue feel rough?



**1** Cream
**2** Fern
**3** Walnut
**4** Copper
**5** Peach
**6** Moss
**7** Cocoa
**8** Honey

**Did you know?** A cat's tongue has tiny hooks that point backward. They work like the teeth of a comb as the cat licks its coat. The hooks also help carry saliva below the surface of the fur.
