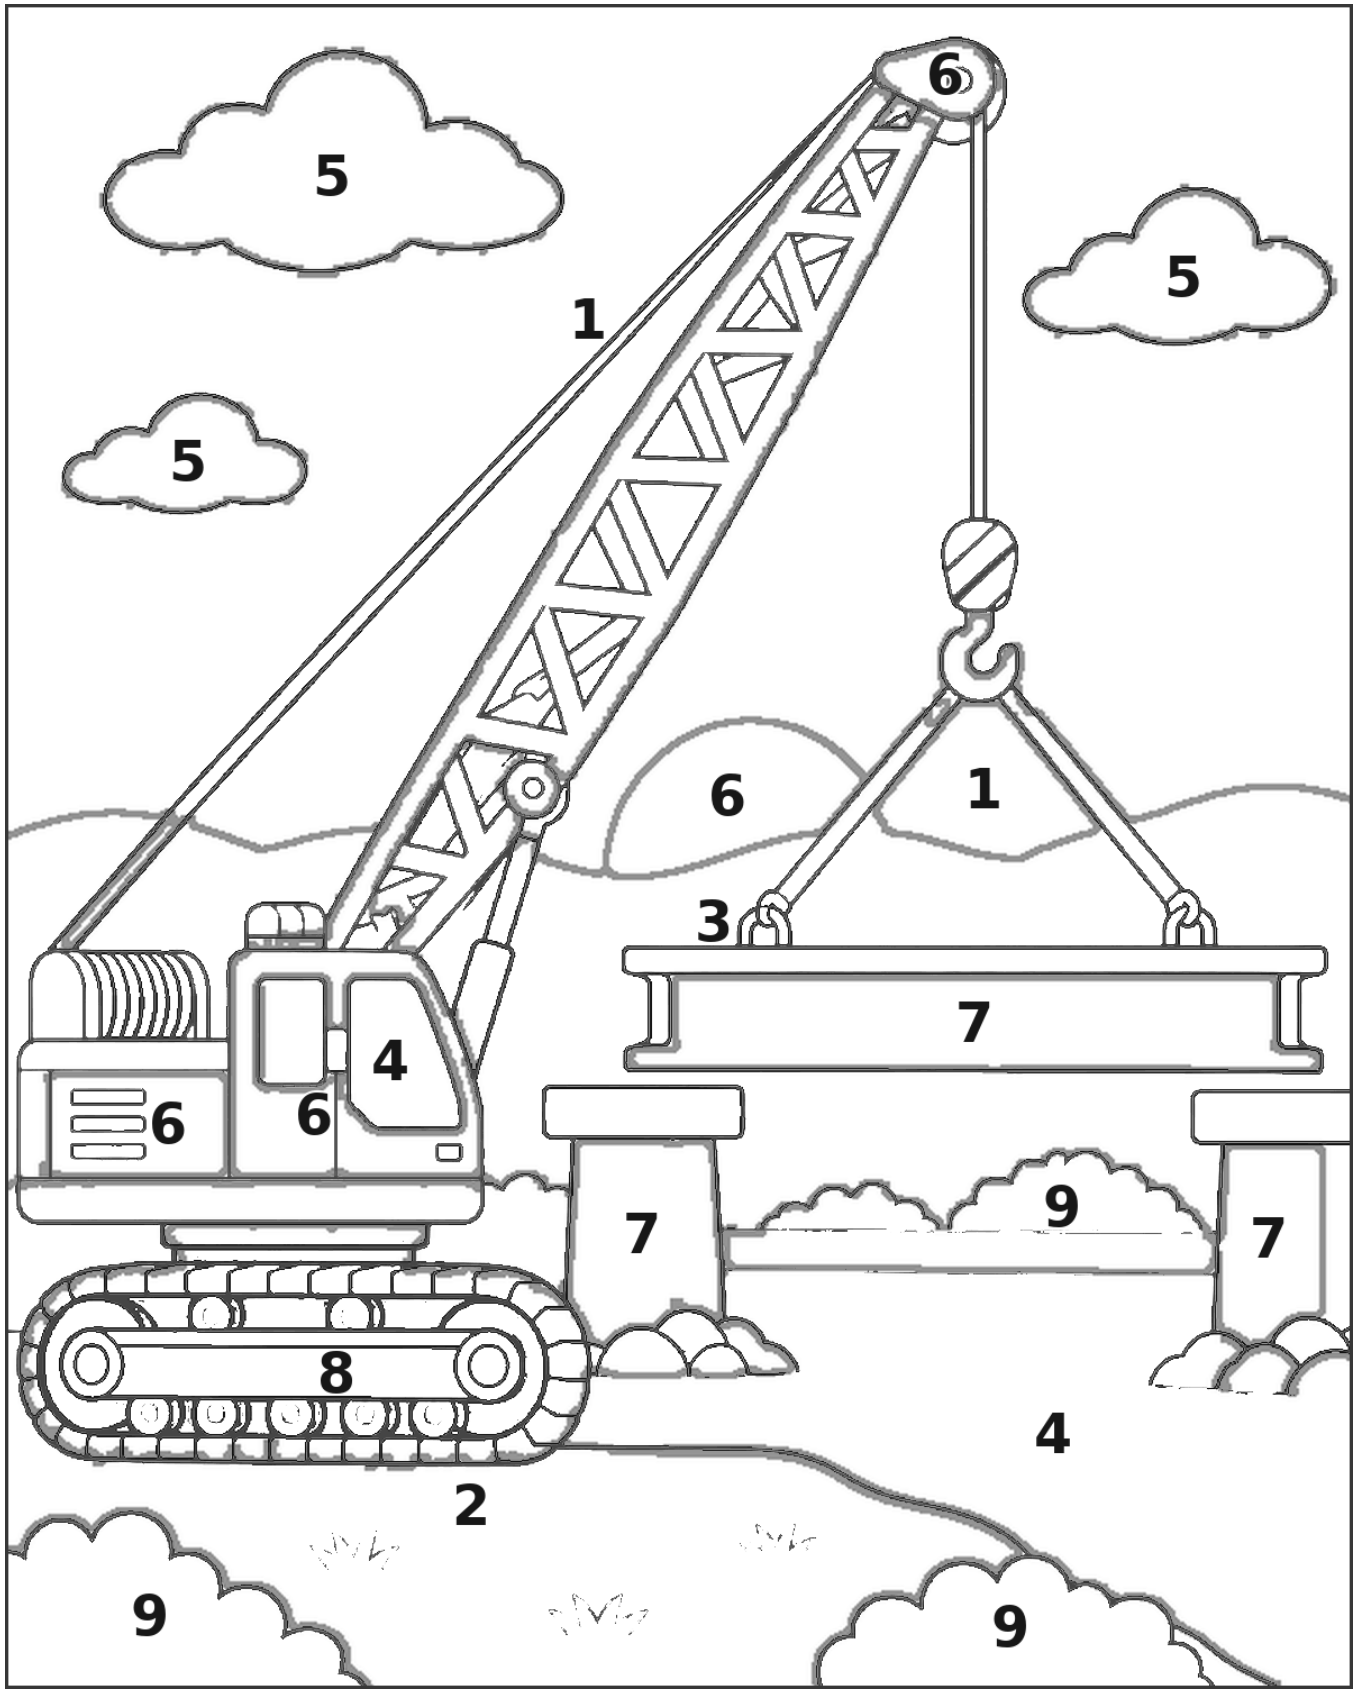
Bridge Crane

Why do some cranes roll on tracks?



1 Lilac	**2 Sage**	**3 Apricot**
4 Sky	**5 Parchment**	**6 Butter**
7 Pearl	**8 Chestnut**	**9 Moss**

Did you know? A crawler crane uses wide tracks that support its weight over a large area. A long boom reaches the load while the tracks stay on the ground. The triangular openings of a lattice boom give it a strong framework without filling the whole shape with steel.
