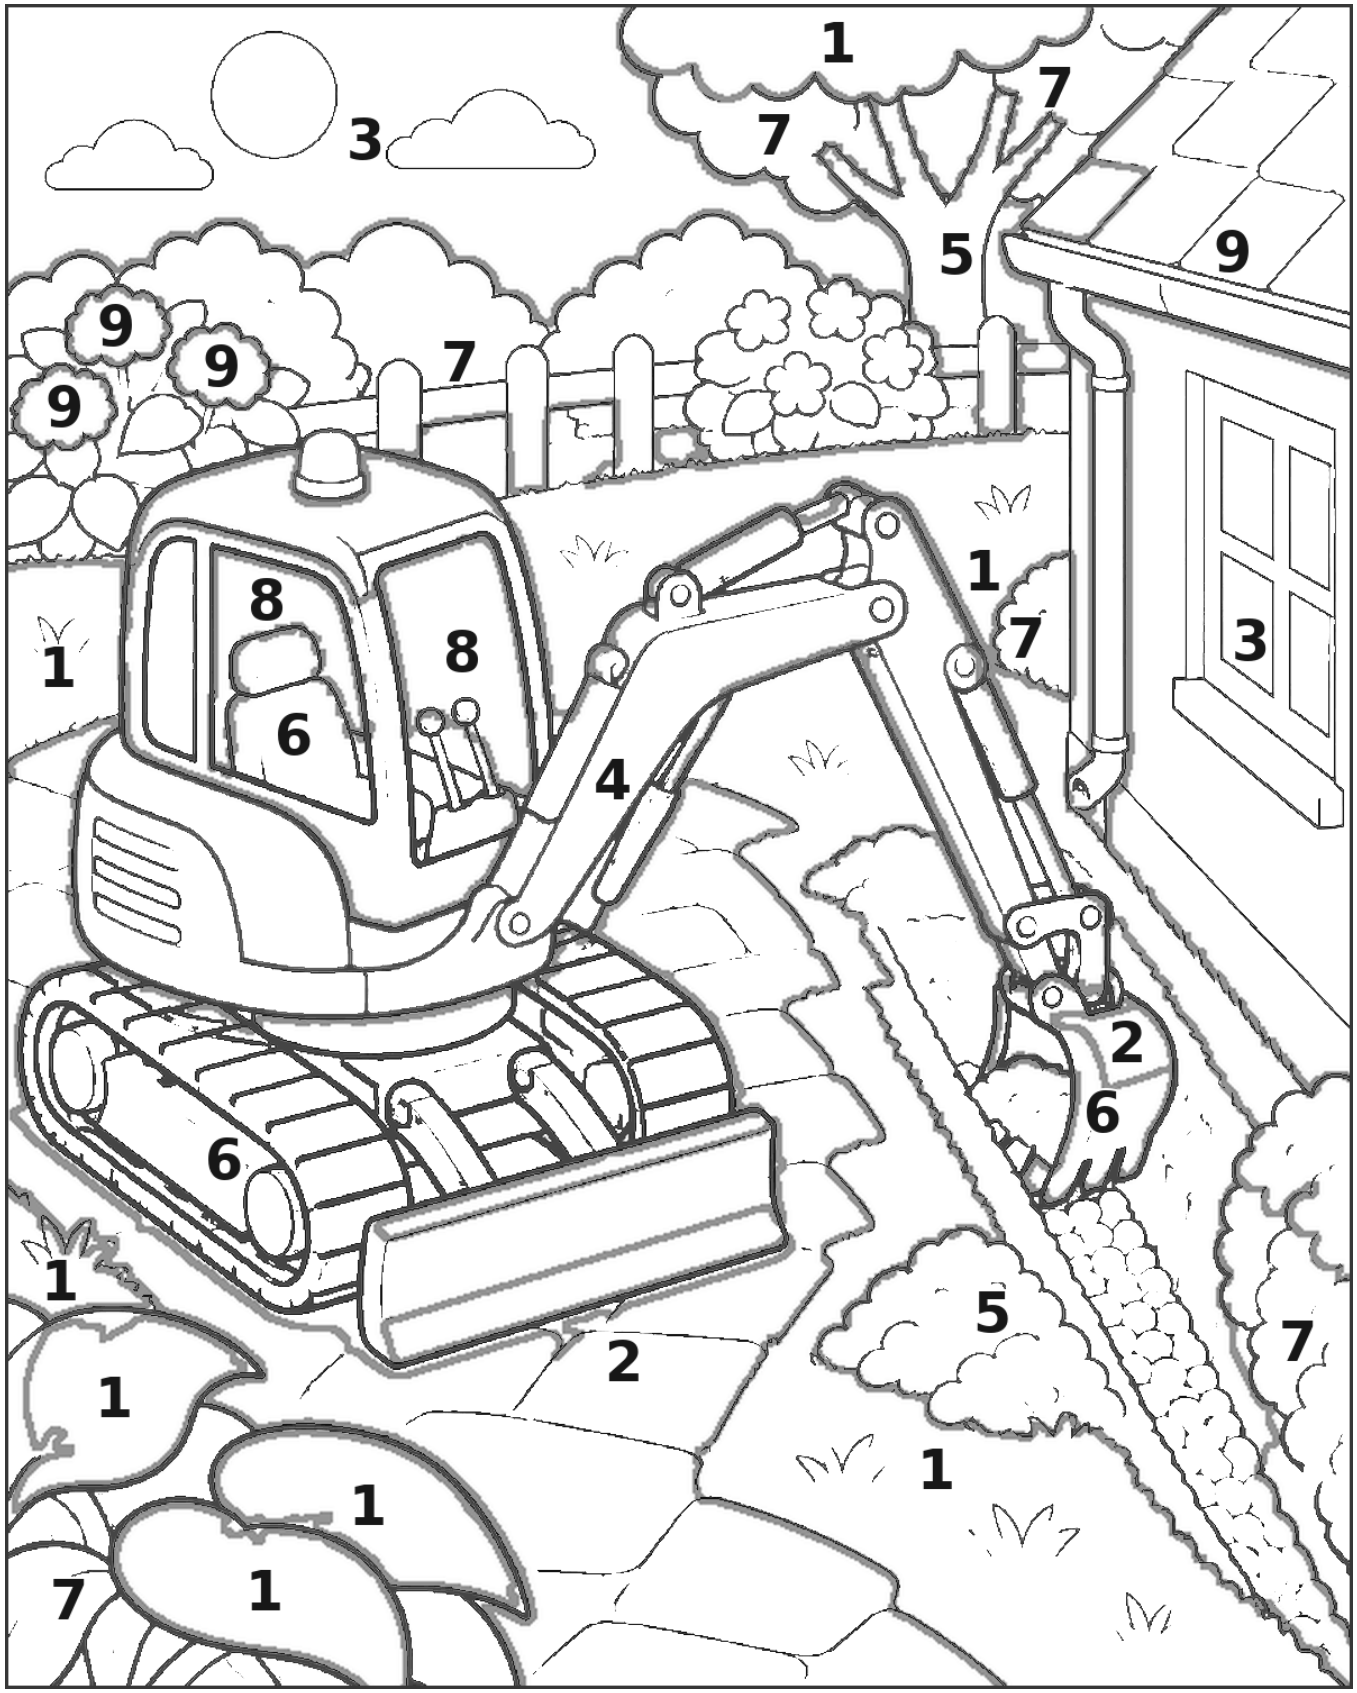
Mini Excavator

What makes a compact excavator fit in a tight space?



1 Sage
2 Mauve
3 Butter
4 Lagoon
5 Chestnut
6 Plum
7 Meadow
8 Sky
9 Honey

Did you know? The short body takes up less room around the machine as its upper part turns. A narrow undercarriage can help it move through gaps. It can still dig with a boom, a stick and a bucket, just like a big excavator.
