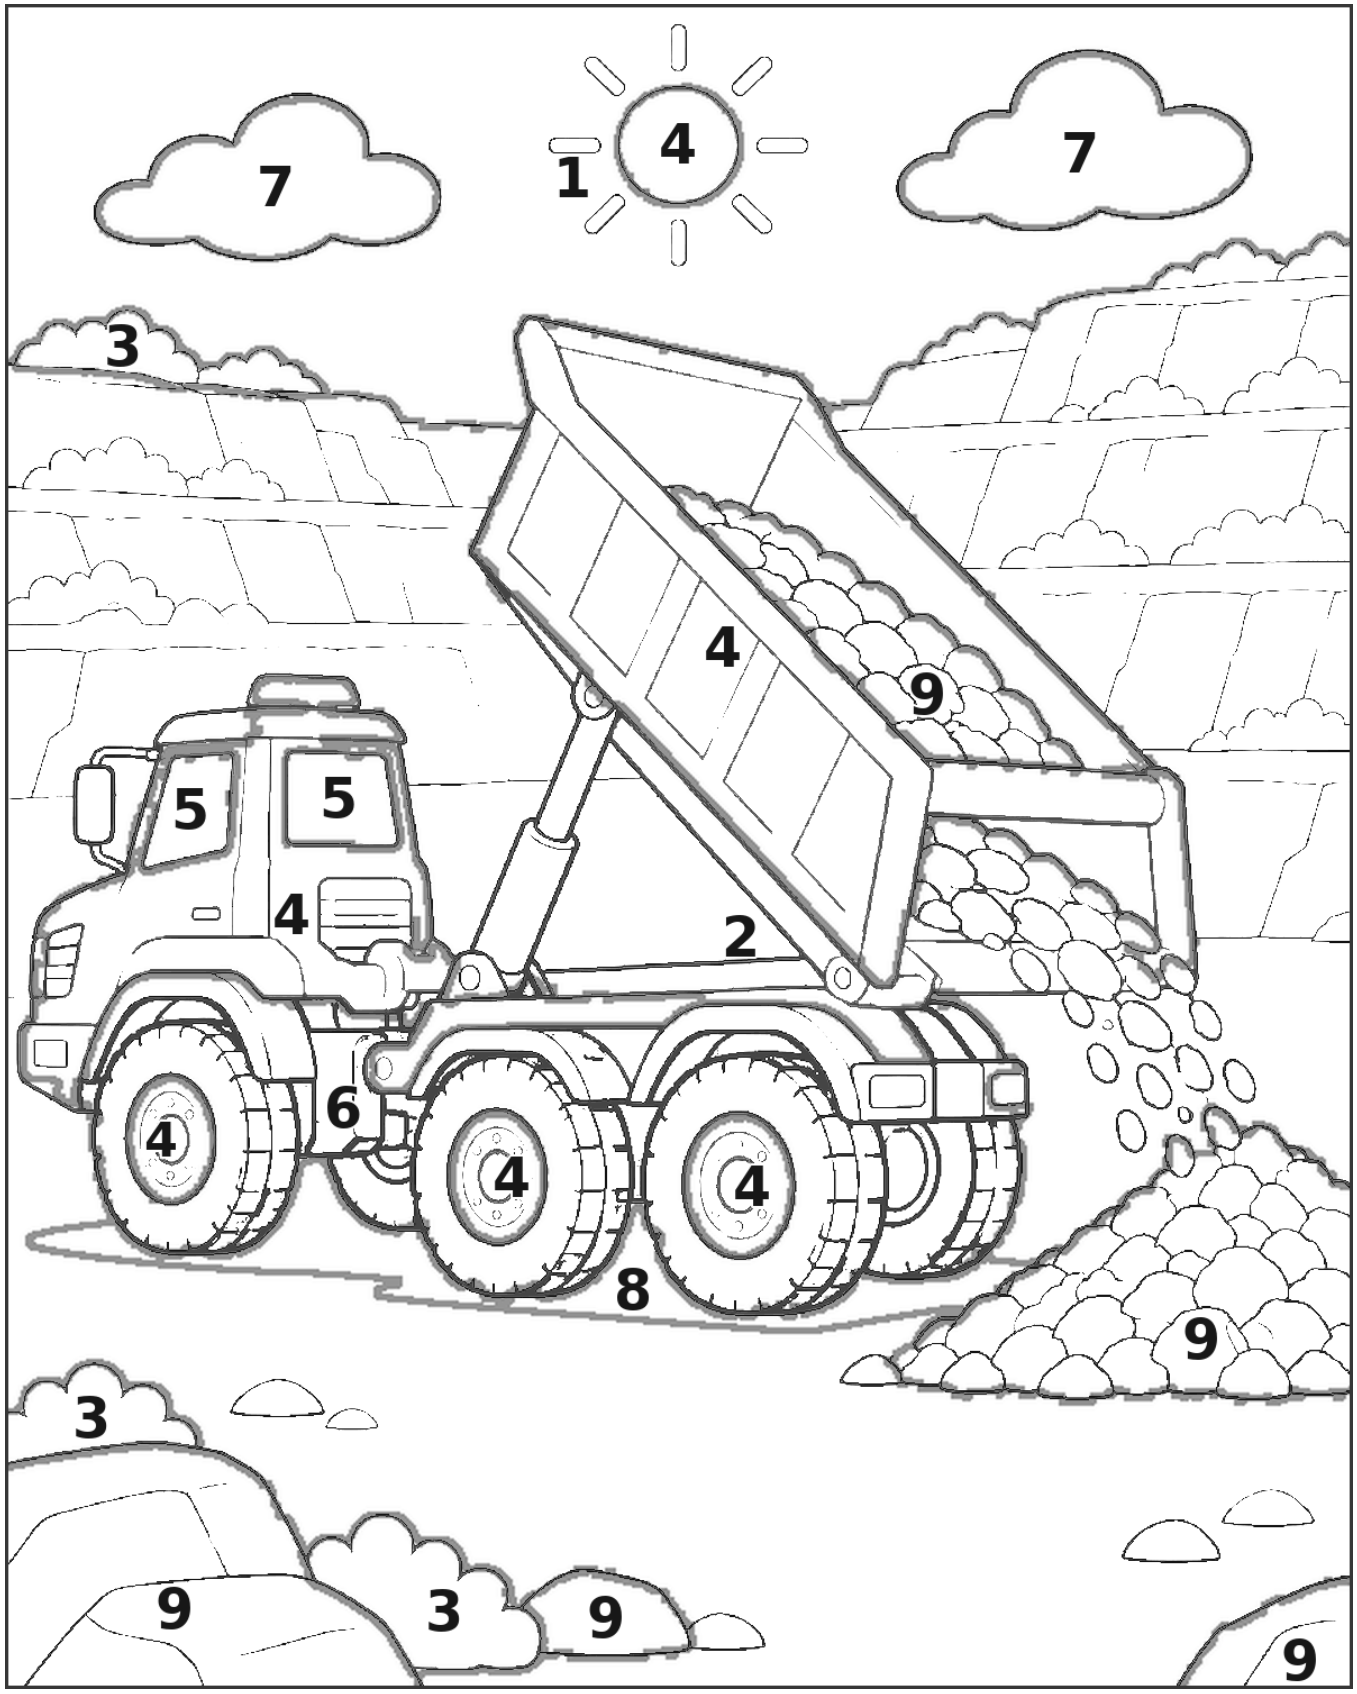
Site Dumper

Why can the dump truck bend in the middle?



1 Lilac
2 Peach
3 Moss
4 Gold
5 Sky
6 Plum
7 Mauve
8 Chestnut
9 Periwinkle

Did you know? An articulated dump truck has a joint between its front cab and rear load section. The sections can turn at that joint, which helps the truck steer on rough ground. A separate cylinder raises the dump bed to unload it.
