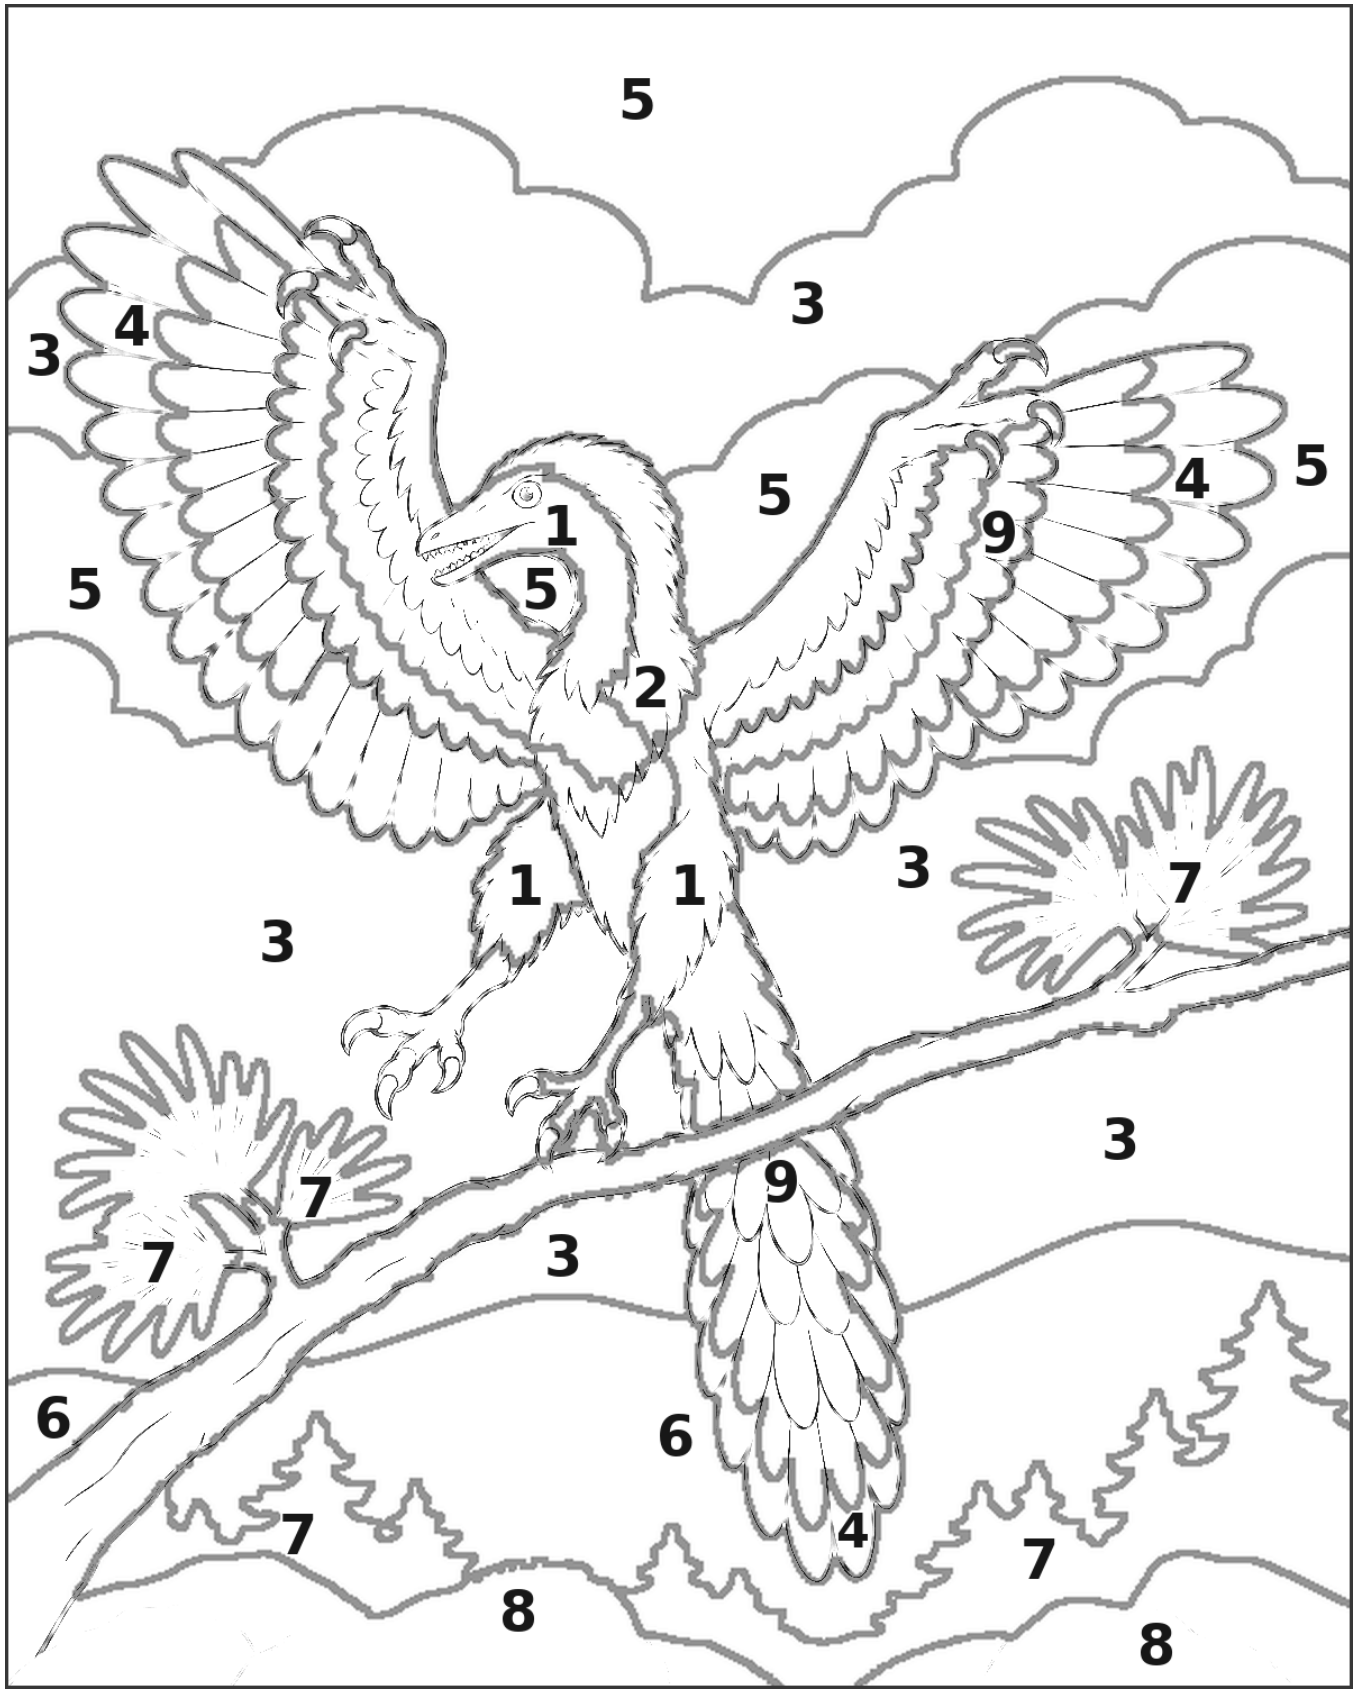
Archaeopteryx

Which clues connect Archaeopteryx to birds?



1 Burnt orange
2 Chestnut
3 Cream
4 Cocoa
5 Coral sky
6 Willow green
7 Pine green
8 Mauve
9 Honey

Did you know? Its fossils preserve long wing feathers, but its jaws had teeth and its tail was a long chain of bones. That mix helped scientists link birds to their dinosaur relatives. Living birds are the descendants of one branch of the dinosaur family.
