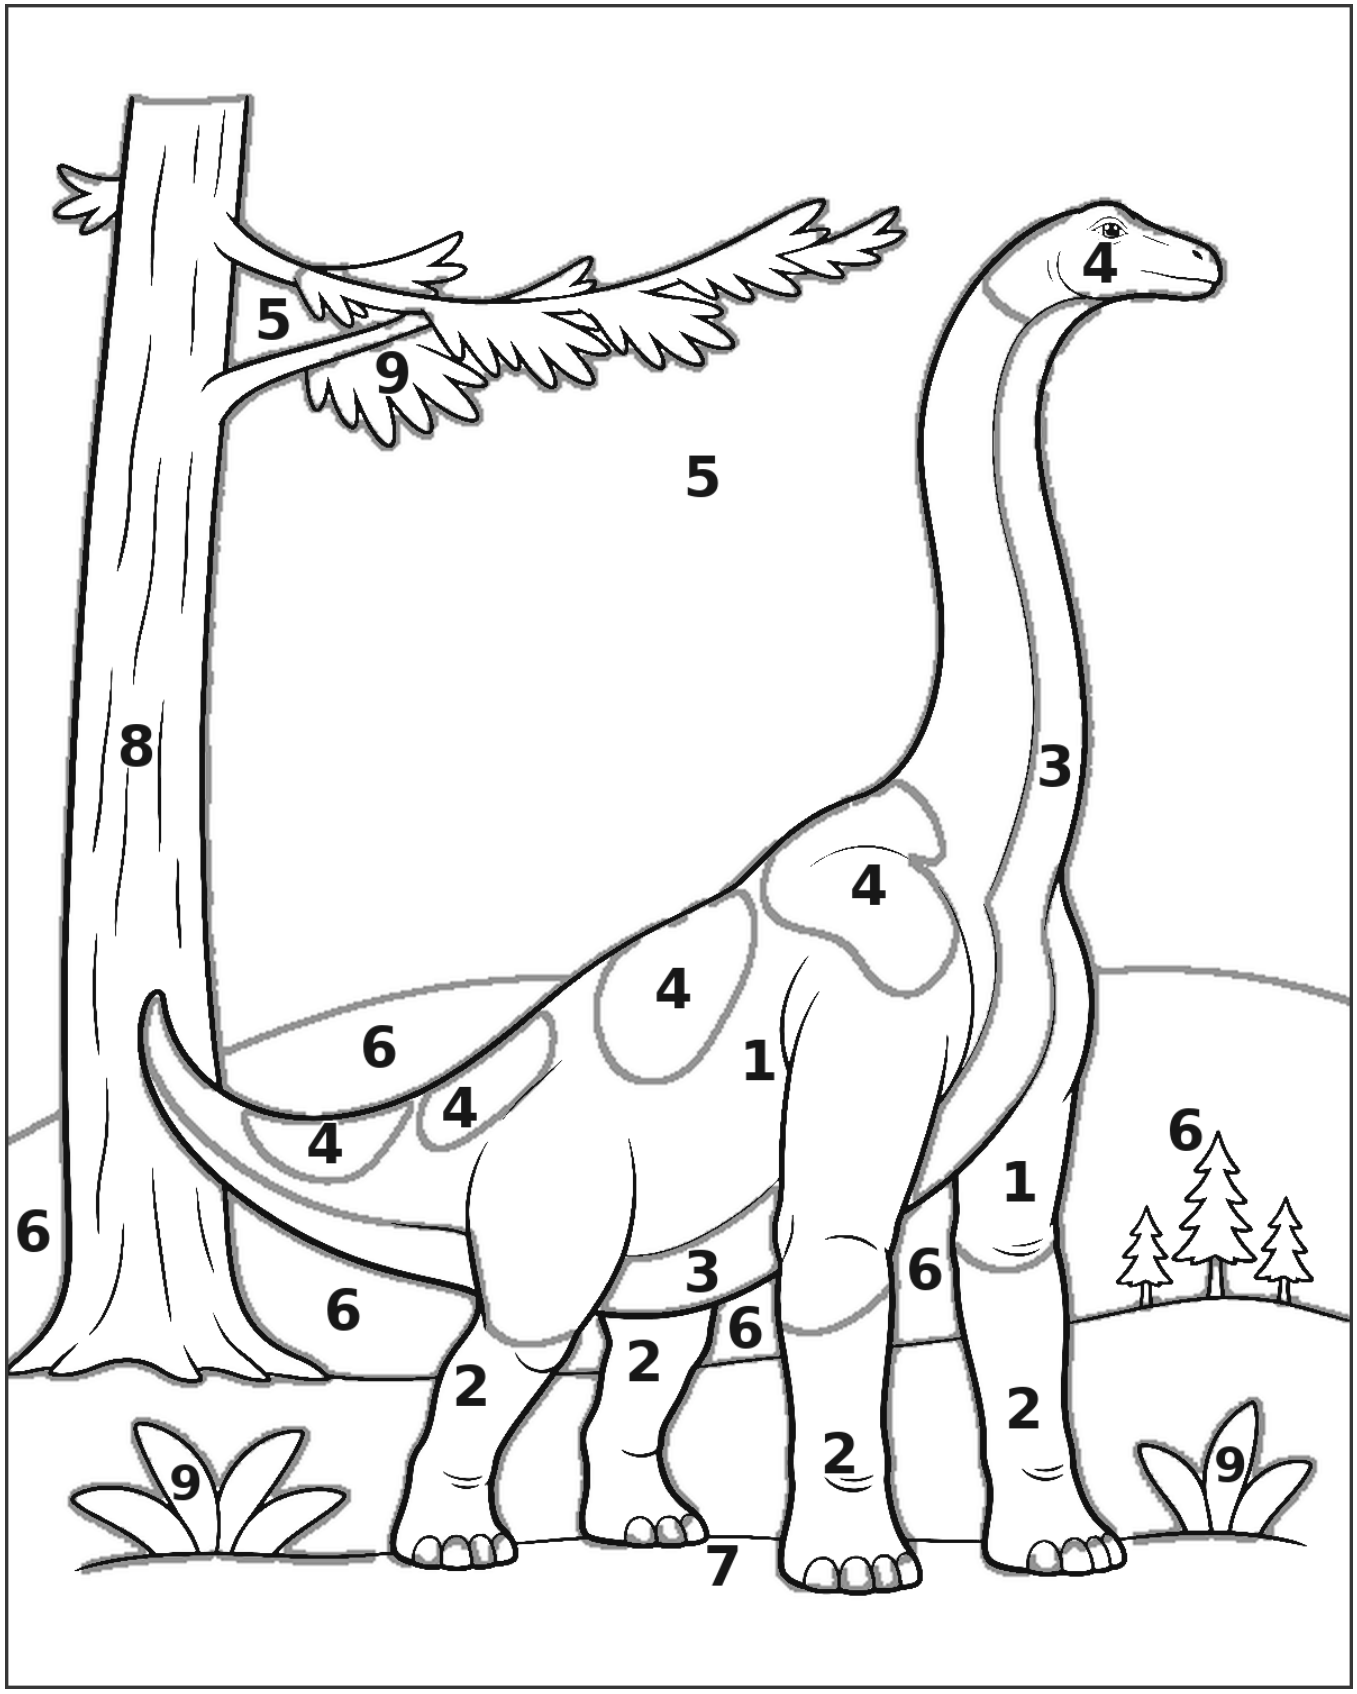
Brachiosaurus

Why were the shoulders of Brachiosaurus so high?



1 Olive
2 Forest green
3 Pistachio
4 Amber
5 Sky blue
6 Blue gray
7 Yellow moss
8 Bark brown
9 Leaf green

Did you know? Its front legs were longer than its back legs. That raised its shoulders and gave its body a sloping shape. Together with its long neck, the tall front end helped it reach leaves high above the ground.
