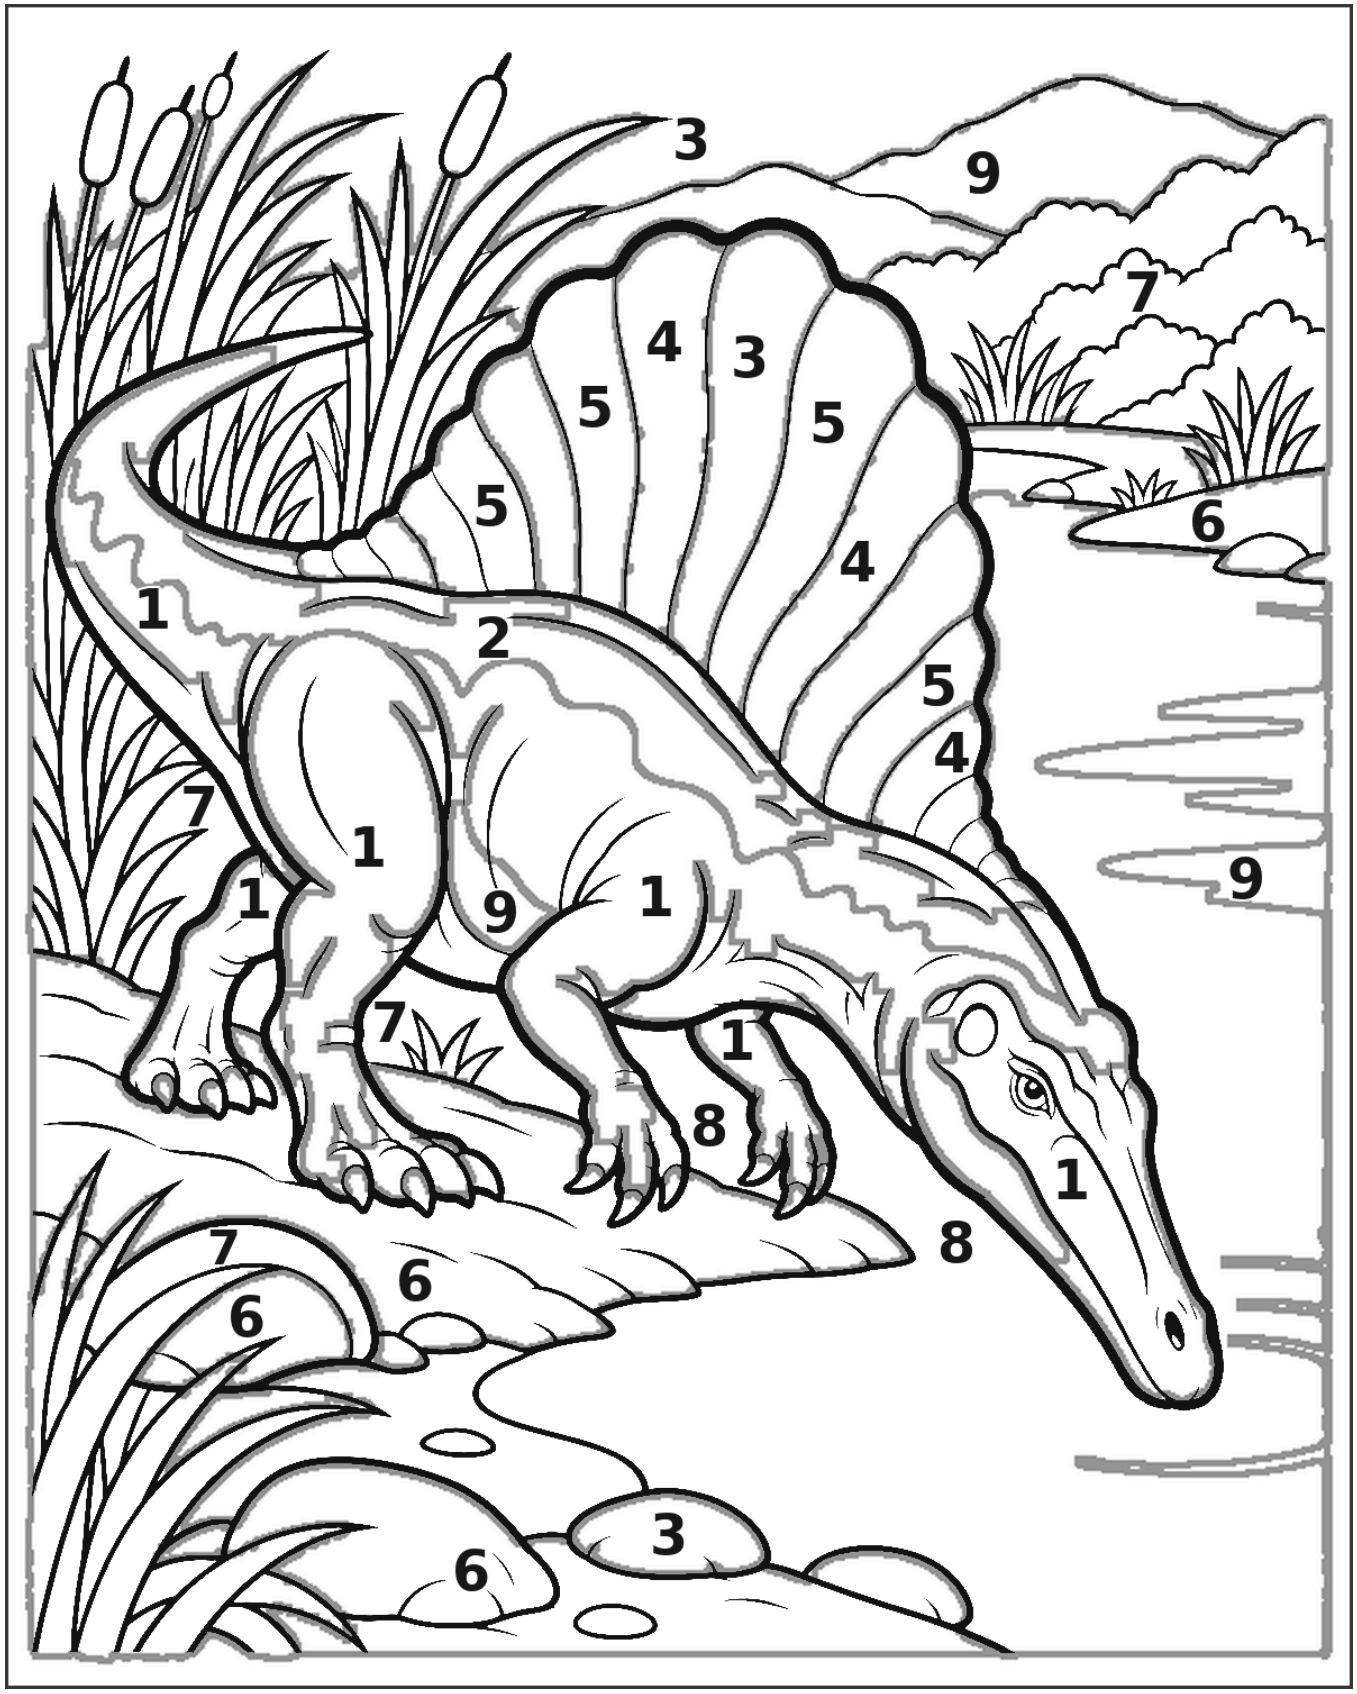
Spinosaurus

Could Spinosaurus chase fish underwater?



1 Slate blue
2 Indigo
3 Cream
4 Vermilion
5 Coral
6 Ochre
7 Reed green
8 River teal
9 Pale mint

Did you know? Spinosaurus had a long snout, cone-shaped teeth and a deep, fin-like tail. Those clues link it to life around water. Scientists still debate whether it chased fish underwater or mostly caught them in shallow water.
