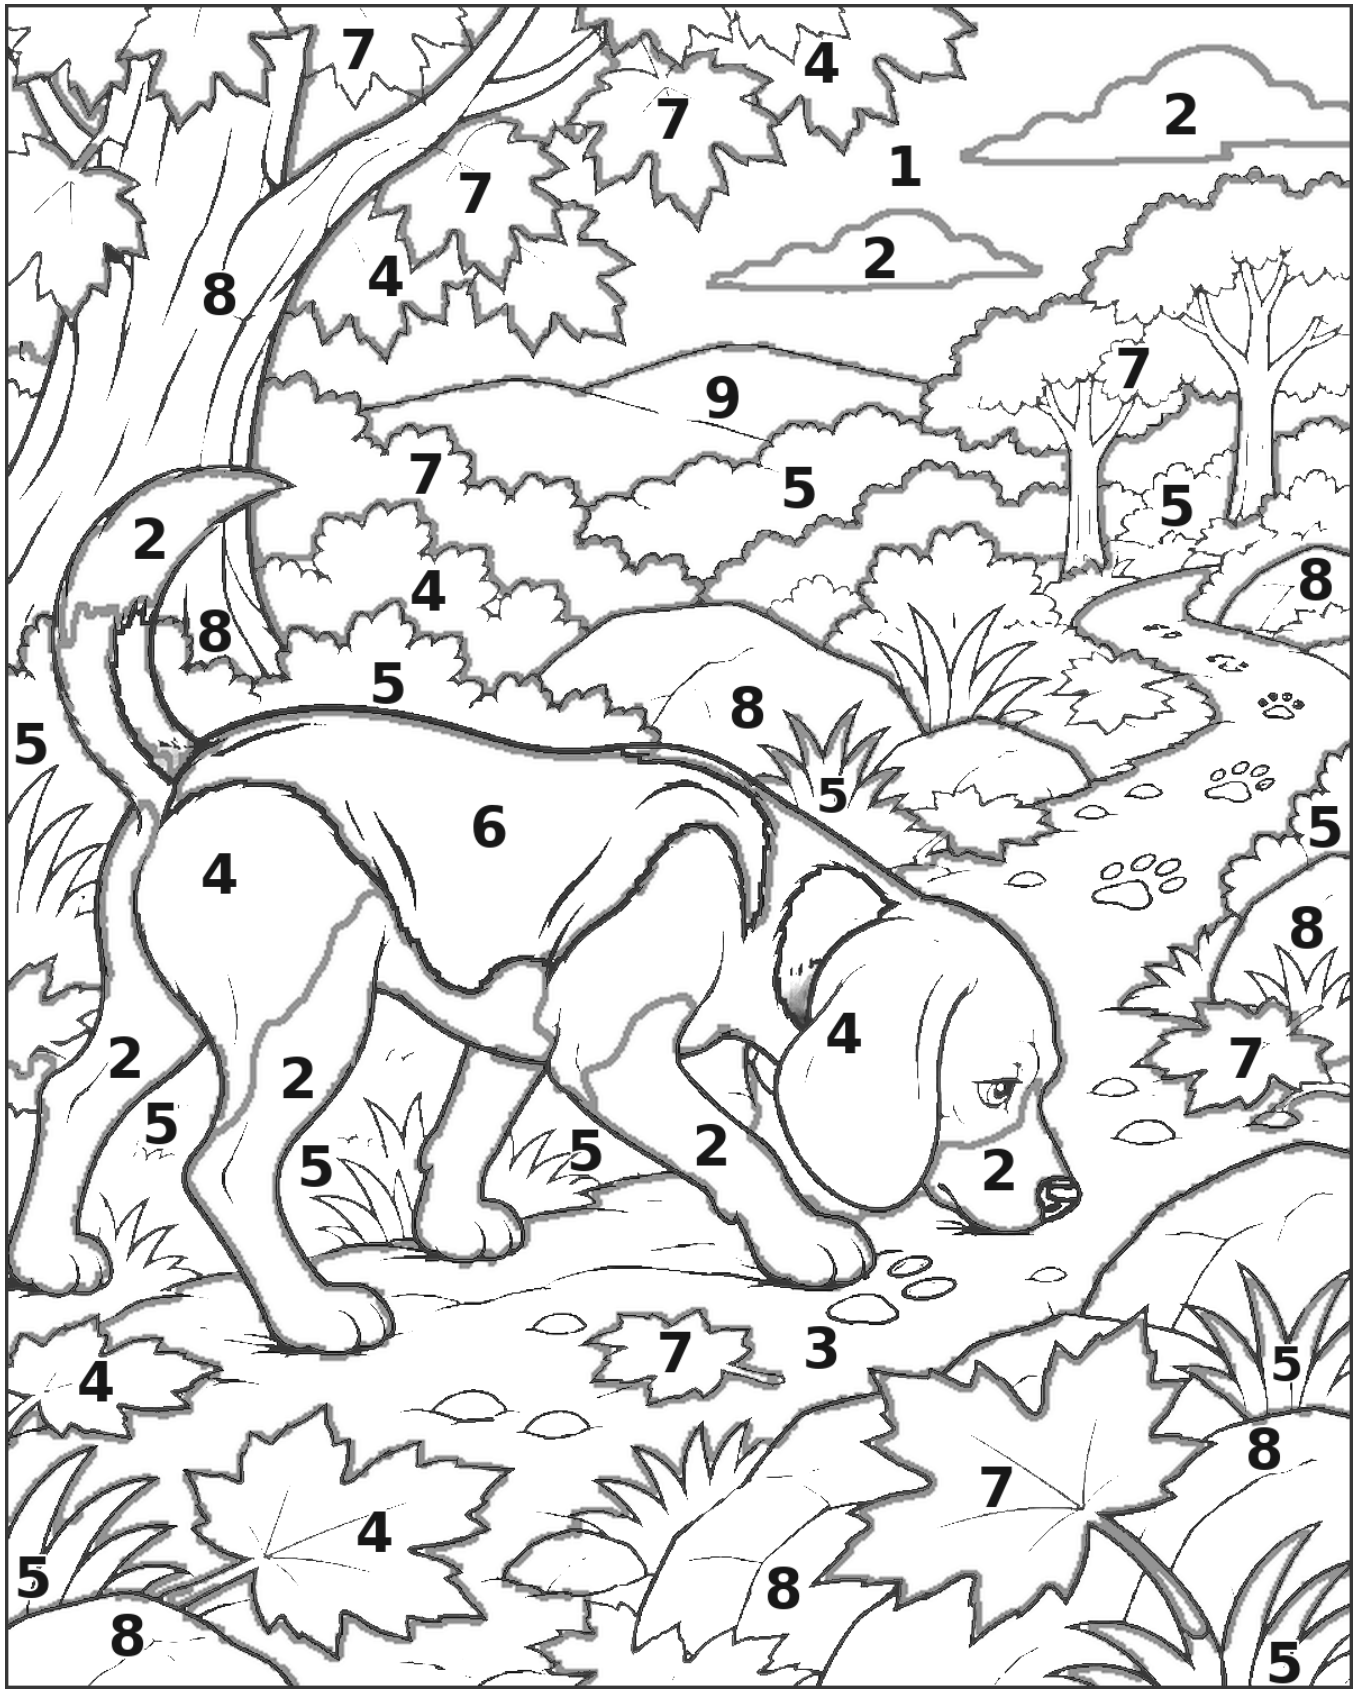
Beagle on the Trail

Why does a beagle sniff in short bursts?



1 Sky	**2 Parchment**	**3 Ash**
4 Copper	**5 Moss**	**6 Charcoal**
7 Gold	**8 Rust**	**9 Mauve**

Did you know? Each sniff draws new air past the dog's nose. The shape of its nasal passages sends some air toward the surfaces that sense odors. Quick sniffs help a dog sample the trail again as it moves.
