Shepherd Scent Search

How can a dog find a hidden object with its nose?

1 Sage	**2 Charcoal**	**3 Honey**
4 Sky	**5 Gold**	**6 Meadow**
7 Plum	**8 Stone**	**9 Chestnut**

Did you know? Every object can carry a mix of scents. In scent work, a dog learns which smell to look for, then searches spaces where the smell is strongest. It can signal to its handler when it finds the right spot.
