Spotted Hyena

What can a spotted hyena eat that many hunters leave behind?

1 Sky	**2 Parchment**	**3 Walnut**
4 Moss	**5 Rust**	**6 Dusk**
7 Gold	**8 Lagoon**	**9 Honey**

Did you know? A spotted hyena's strong jaws and teeth can crack bones. Its digestive system can handle bone and skin, so it gets food from parts of a carcass that many animals leave behind.
