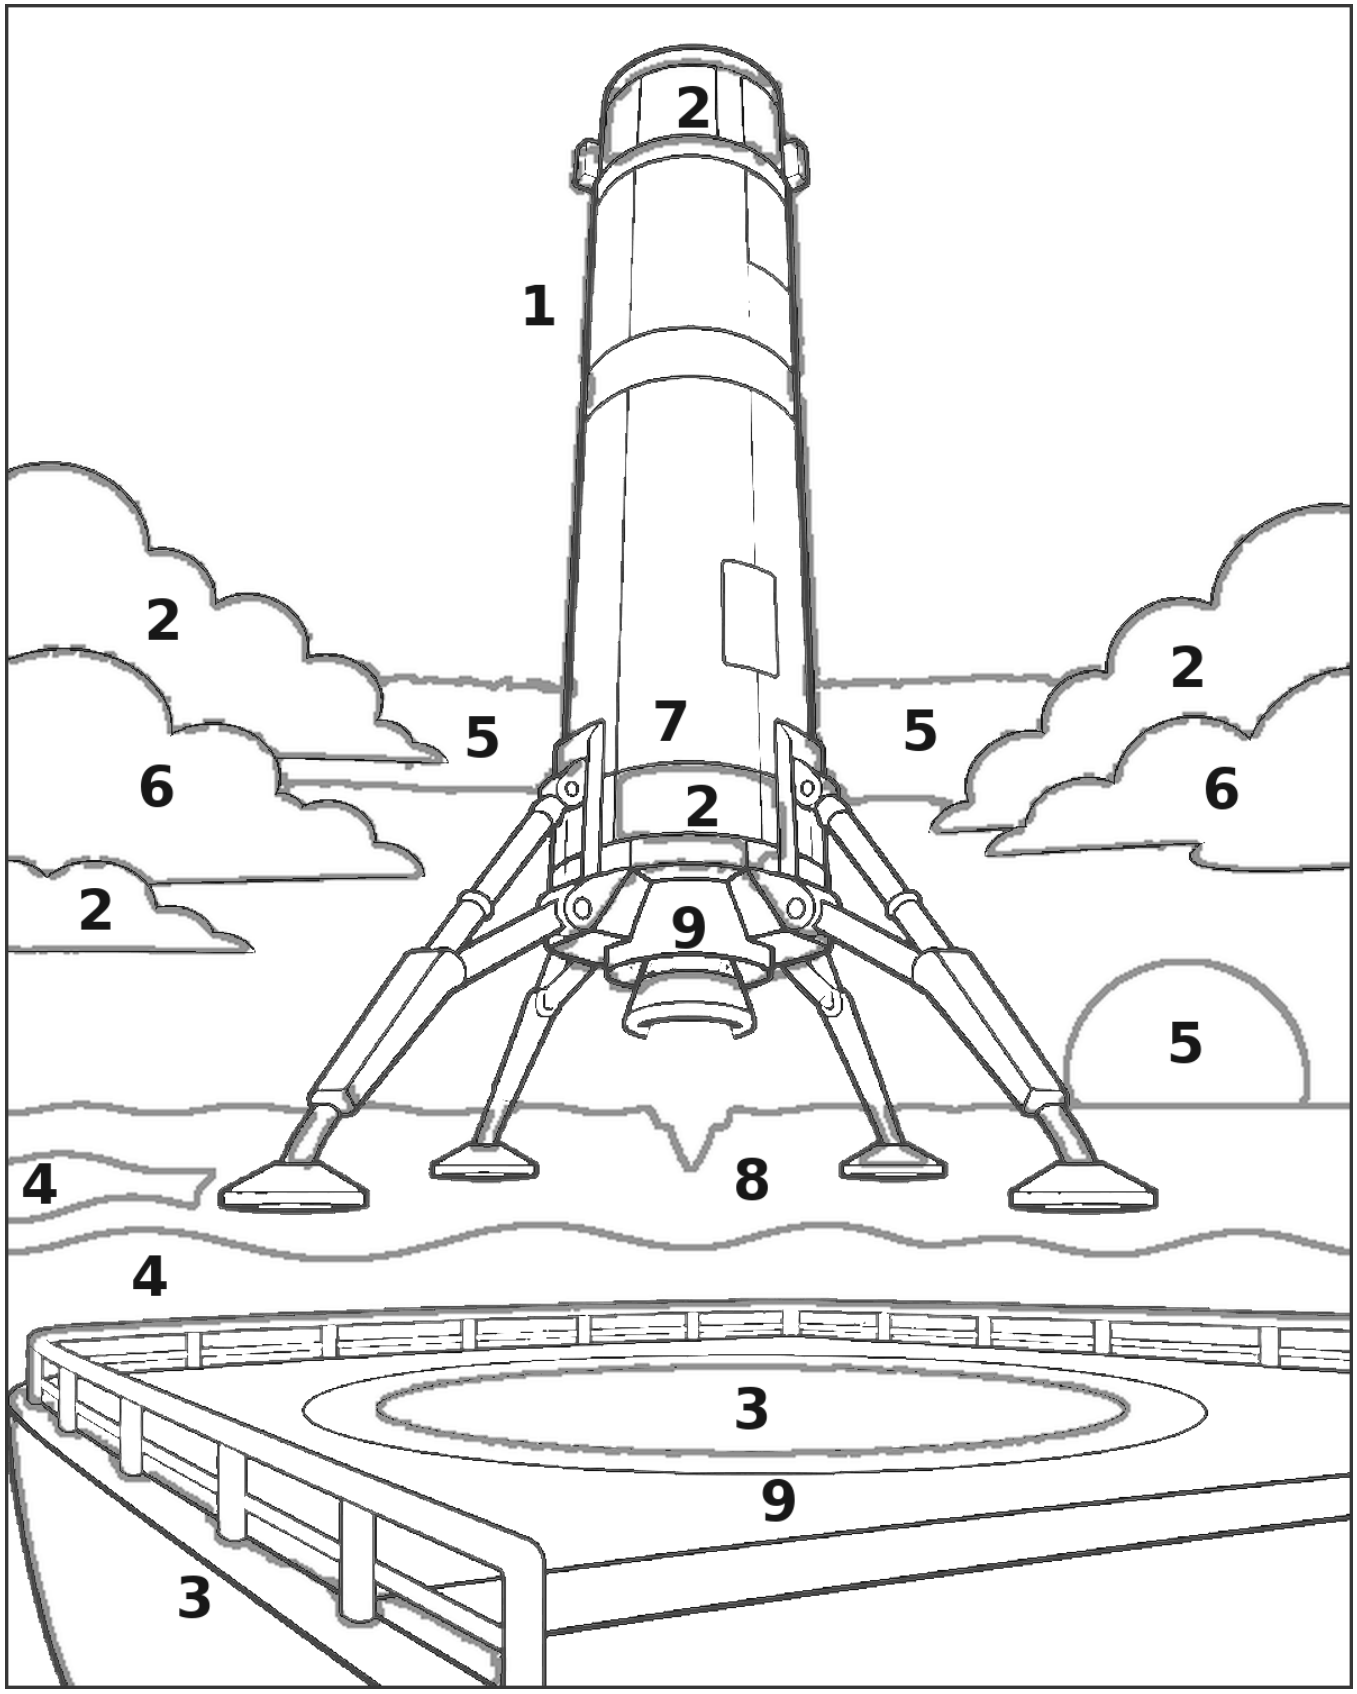
Booster Landing

Why would a rocket land on a ship?



1 Sky
2 Cream
3 Plum
4 Ink blue
5 Seafoam
6 Lilac
7 Honey
8 Denim
9 Ash

Did you know? An ocean platform gives a returning booster a place to land downrange, along its path after launch. NASA has recorded Falcon 9 first stages landing on drone ships. Bringing a stage back makes it possible to prepare that stage for another flight.
