Opal Seahorse

Why does a real seahorse curl its tail?

1 Teal	**2 Honey**	**3 Moss**
4 Mauve	**5 Rust**	**6 Lilac**
7 Gold	**8 Coral**	**9 Peach**

Did you know? A seahorse can wrap its tail around a blade of seagrass or another holdfast. This helps it stay in one place when water moves past. A tail that grips like this is called prehensile.
